

ADEGBORO DAVID OLUWADAMILARE

AI Trainer | Data Annotator | AI Response Evaluator | Research & Virtual Assistant

Port Harcourt, Nigeria (Remote) | +234 810 159 7428 | adegborodamilaredavid@gmail.com

Portfolio: dave-4u.github.io | GitHub: github.com/Dave-4u

PROFESSIONAL SUMMARY

Computer Science graduate (Second Class Upper, Elizade University, 2026) with six months of corporate ICT support at the Oando Energy Resources project site. Experienced in following set procedures, keeping accurate records, explaining technical issues in plain language, and escalating problems correctly, skills that transfer directly to data annotation, AI response evaluation, content moderation, and search quality rating. Able to read and assess code in Python, Java, JavaScript, and Kotlin, research unfamiliar topics, and give clear, structured written feedback. Available for full-time, remote, freelance, and contract work.

CORE SKILLS

AI and Data Work: Following detailed task guidelines, accuracy and consistency checks, fact-checking and source verification, evaluating written and code responses, structured written feedback

Research and Writing: Online research, summarising technical content, report writing, step-by-step documentation, clear written English

Review and Moderation: Following set procedures, spotting errors and inconsistencies, basic awareness of phishing, MITM attacks, malicious payloads, scams, and harmful content, escalation, confidential data handling

Technical Skills: Python, Java, JavaScript, Kotlin, Jetpack Compose, Firebase, HTML, CSS, C# (basic), Git/GitHub, Windows setup and troubleshooting, networking fundamentals (Cisco Packet Tracer)

Virtual Assistance and Tools: Microsoft Office (Word, Excel, PowerPoint), Outlook, OneDrive, end-user technical support, data entry and record keeping

PROFESSIONAL EXPERIENCE

ICT Intern (SIWES), Jevi Austin International Company Ltd, Oando Project Site | April 2025 – October 2025

Six-month industrial training: end-user support, hardware maintenance, application development

- Provided first-level technical support to staff, explaining issues and fixes clearly to non-technical users and escalating complex cases.
- Installed and configured Windows 10/11, imaged systems, and set up Outlook and OneDrive for staff.
- Kept accurate daily logs of system updates and followed company standard operating procedures.
- Diagnosed and replaced faulty hardware components on desktops and laptops.
- Commended by supervisors for punctuality, willingness to learn, and attention to detail.

IT Intern, Rewod Technologies, Port Harcourt | August 2024 – October 2024

Three-month industrial placement

- Completed introductory training in cybersecurity and ethical hacking concepts.
- Gained basic awareness of phishing, social engineering, man-in-the-middle (MITM) attacks, malicious payloads, and common online threats.

PROJECTS

TellMe: Location-Based Community Information App | Final-year project

Kotlin, Jetpack Compose, Firebase | github.com/Dave-4u

- Designed, built, and tested an Android app for sharing location-based community information. Smaller web and programming projects (storefront, expense tracker, console games) are documented on GitHub.

VOLUNTEER EXPERIENCE

Peer Tutor, Elizade University

- Tutored first-year students in Cisco Packet Tracer and basic networking, breaking down technical topics into clear, step-by-step explanations.

EDUCATION

B.Sc. Computer Science, Elizade University, Ilara-Mokin, Nigeria | Class of 2026

Second Class Upper (2:1)
