

ADEGBORO DAVID OLUWADAMILARE

Computer Science Graduate | IT Support | Android (Kotlin / Jetpack Compose)

Port Harcourt, Nigeria · +234 810 159 7428 · adegborodamilaredavid@gmail.com

Portfolio: dave-4u.github.io · GitHub: github.com/Dave-4u · Open to remote

PROFESSIONAL SUMMARY

2026 B.Sc. Computer Science graduate (Elizade University) with six months of corporate SIWES at Oando across help desk, hardware, and software. Built **TellMe** (Kotlin, Jetpack Compose, Firebase) plus browser projects in HTML/CSS/JS. Comfortable troubleshooting end-user issues, explaining technical ideas clearly, and shipping small products with AI-assisted coding. Seeking a remote or hybrid entry-level role in IT support or junior mobile/software development.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, Kotlin, C# (basic)

Mobile: Kotlin, Jetpack Compose, Firebase

Web: HTML, CSS, JavaScript (storefront, tools, and interactive demos)

IT Support: End-user support, hardware troubleshooting, software troubleshooting

Networking & Security: Cisco Packet Tracer, foundational ethical hacking / cybersecurity

Other: Peer tutoring, clear English for remote collaboration, Git/GitHub

PROFESSIONAL EXPERIENCE

Oando — SIWES Student (IT)

April 2025 – October 2025 | Corporate internship rotation

- Delivered end-user support during a three-month Help Desk placement: diagnosed common computer issues, guided users through fixes, and escalated when needed.
- Completed a one-month Hardware rotation focused on diagnostics and basic maintenance of workplace machines and peripherals.
- Spent one month with the Software team gaining exposure to C# and enterprise software operations.
- Learned how help desk, hardware, and software teams work together in a large corporate IT environment.

Rewod Technologies — IT Student

August 2024 – October 2024 | Three-month placement

- Studied foundational ethical hacking and cybersecurity concepts through structured technical training.
- Practiced security awareness applicable to supporting users and protecting systems at work.

PROJECTS

TellMe — Location-Based Community Information App

Kotlin · Jetpack Compose · Firebase | Final-year project

- Designed and built an Android app for location-based community information sharing.
- Implemented UI in Jetpack Compose; integrated Firebase for data and core functionality; tested key features for stability.

ShopFront — Responsive E-commerce Storefront

HTML · CSS · JavaScript

- Built a product catalog with search/category filters, cart persistence, and a validated checkout UI demo.

Selected practice projects (see portfolio)

Expense tracker, pathfinding visualizer (Dijkstra/A*), miniature interpreter, thread-safe LRU cache, heap & trie playground — HTML/CSS/JS and systems demos on GitHub.

VOLUNTEER EXPERIENCE

Peer Tutor — Cisco Packet Tracer | Elizade University

- Coached 100-level students on Packet Tracer and basic networking using hands-on simulations.

EDUCATION

B.Sc. Computer Science — Elizade University

Graduating class of 2026
